

The Bible Prophecy Archive is a non profit endeavor to curate and preserve quality teachings on the subject of Bible prophecy in order to ensure the survival of these materials in the event of natural disasters, cyber attacks, or censorship.

This archive includes articles, books, audiobooks, and videos, from various Bible prophecy teachers, used with their permission.

The files can be viewed on a phone, computer or similar device.

Instructions:

1. Download the zip file, ideally to a computer
2. Unzip or “extract” the file
3. Transfer the now unzipped folder to the device, or storage card using the computer.

Notes:

It is difficult to unzip a .zip file using the phones system. For this reason we recommend you use a computer to unzip the file before transferring the unzipped file to the storage media or device.

If you are reusing an old storage card or thumb drive you may need to reformat it (by right clicking) using “exFAT” which is a file system that allows for larger files.

Some items on this drive only work for a Windows PC, for example there is a Bible study software program called Esword.
